Rick,

Here's some more preliminary results on the GenX sampling at the private water supplies in WV and OH. The levels previously identified in the raw water appear to remain in the same range. The additional water supplies indicate no presence of GenX in the raw water, so it would appear that at this point the impact to the ground water is somewhat limited. Time will tell.

Roger

Roger,

I am attaching our DRAFT working spreadsheet. We are still missing some of the draft results and some results are already final. Thanks.

Kathy

Thanks Kathy. Any results in yet for the other second round HFPO-DA monitoring sites?

Good Morning,

I am attaching the updated map and spreadsheet that we will be discussing when this meeting is rescheduled. Thanks.
